

Product Name : VALSARTAN

Product Description : Valsartan is an angiotensin II receptor antagonist (more commonly called an "ARB", or angiotensin receptor blocker), with particularly high affinity for the type I (AT1) angiotensin receptor. By blocking the action of angiotensin, valsartan dilates blood vessels and reduces blood pressure. Valsartan is indicated for treatment of high blood pressure, congestive heart failure (CHF), or post-myocardial infarction(MI).

Chemical Formula :

(S)-3-methyl-2-(N-([2'-(2H-1,2,3,4-tetrazol-5-yl)biphenyl-4-yl]methyl)pentanamido)butanoic acid

CAS No : 137862-53-4

Molecular Formula : C₂₄H₂₉N₅O₃

Molecular Weight : 435.519
